## Professional Summary

---

Self-motivated Full Stack Web Developer with hands-on experience and i'm able to build scalable websites and modern web applications. Specialized in both frontend and backend development with proficiency in technologies like Laravel, React, PHP, and JavaScript. Passionate about delivering clean UI/UX, SEO friendly optimization.

## Experience

---

### Front-End Developer

*RoyGlobalWebBussiness.com*

- Here i join as intern web Developer. I have to build front end ui/ux with html, js, css, bootstrap, jquery and some other js library and have to work with bootstrap template.

### Full Stack Developer

*LetsMakeCompany.com*

- I made from frontend design to backend logic using PHP, MySQL, Bootstrap, and JS.
- Integrated here secure payment gateway for online service payments and
- Managed on-page SEO, site structure, and UI design, user authentication, dashboard, and deployment

### Project

*TypingFix.com*

- I build TypingFix.com from scratch with multilingual typing test capabilities and
- Used Laravel for backend and Inertia.js/React and Blade for frontend
- Implemented multilingual SEO strategies, optimized UX and site speed

### Freelance

*Izago.com/ Vivahyog.in*

- i work as freelancer with this both company as front end developer

## Skills
