Professional Summary

Self-motivated Full Stack Web Developer with hands-on experience and i'm able to build scalable websites and modern web applications. Specialized in both frontend and backend development with proficiency in technologies like Codeigniter, Laravel, React, Core PHP, and JavaScript. Passionate about delivering clean UI/UX, SEO friendly optimization.

Experience

Full Stack Developer

RoyGlobalWebBussiness.com | 2023 (January - July)

- I have joined as a Web Developer Intern, where I am responsible for building and enhancing the front-end UI/UX using HTML, CSS, JavaScript, Bootstrap, jQuery, and various JavaScript libraries.
- I also work with Bootstrap templates to create responsive and user-friendly designs, and handle backend development using Core PHP and CodeIgniter 4.

Full Stack Developer

LetsMakeCompany.com | 2023- 2024

- Developed the complete web application — from front-end design to back-end logic — using Core PHP, MySQL, Bootstrap, and JavaScript.
- Integrated a secure payment gateway for processing online service transactions.
- Handled on-page SEO optimization, site structure, UI design, user authentication, dashboard management, and deployment.

Project

TypingFix.com

- I build TypingFix.com from scratch with multilingual typing test capabilities and
- Used Laravel for backend and Inertia.js/React and Blade for frontend
- Implemented multilingual SEO strategies, optimized UX and site speed

Freelance

Izago.com/ Vivahyog.in

- i work as freelancer with this both company as front end developer

Skills

- Languages & Frameworks: PHP, Laravel, Codeigniter, JavaScript, React, HTML, CSS, MySQL, Inertia.js
- Tools & Platforms: Git, GitHub, Figma, Vercel, Hostinger
- Web Fundamentals: SEO, UI/UX Design, Mobile Optimization, REST APIs
